DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4, 6-11, and 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morris et al. (US 5,459,500) in view of Gordon et al. (US 4,913,656).

Morris et al. disclose a separate electrical connector, electrical interconnecting a first conductor (20) of a first electrical device (18) to a second conductor (14) of a second electrical device (12), comprising:

a layer of anisotropic conductive elastomer (22); and

a compressing means (26);

wherein the first electrical device is a flex cable; and

wherein the second electrical device is a printed circuit board.

Morris et al. substantially disclosed the claimed invention except for:

- at least the first and second electrical device is being a ribbon cable.
- at least the first and second electrical device is being a coaxial cable.

It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitation. *Ex Parte Masham, 2 USPQ2d 1647 (1987)*.

Morris et al. substantially disclosed the claimed invention except for the conductors is being as a multi-conductor cables.

Gordon et al. teach multi-conductor ribbon cable (22) with partially exposed conductors (131).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute the Morris's conductors by the Gordon's multi-conductor cables, as taught by Gordon for flexibility.

Allowable Subject Matter

3. Claims 5, 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claim 5, the prior art of record fails to teach a paddle board having conductors directly connected to conductors of the ribbon cable, and must be in combination with all of the claims which it is depended from.

Regarding claims 12-14, the prior art of record fails to teach the compressing means comprises mounting sleeves coupled to both cables, and must be in combination with all of the claims which it is depended from.

Response to Arguments

3. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
